

Pilot pin / 顶针

介绍 Introduction

» 钢板钻顶针，简称顶针，用于钢板钻钻孔时定位与钻孔完成后弹出料芯的作用；有扁型、槽型、套式等多种样式，满足不同钻孔需求；规格齐全，性能稳定。

Introduction: annular cutter pilot pin, pilot pin for short, is used for positioning when annular cutter drilling, and popping out the material core when drilling is completed; Including different types of flat shape, groove shape, cover type, etc., to satisfy different drilling demands; Completed specifications and stable performance.

型号规格 Model and specification

型号 Model	图片 Picture	直径 Diameter	顶针长度 Length of pilot pin(mm)
DPT		7.98	130-266
DPB		6.34	77-203
		7.98	70-184
		12	192
DPC		5.3*6.34*7.98	127-252
